

Test Plan for Bongobd.com

1. Test Plan ID

TP-BONGO-001

2. Introduction

This test plan outlines the testing strategy and scope for Bongobd.com — a video streaming platform offering movies, series, and live TV content.

3. Objectives

To verify that all user-facing features of Bongobd.com function correctly, provide a smooth experience, and meet business requirements.

4. Scope

Includes testing of:

- User registration/login/logout
 - Video playback (free/premium)
 - Subscription & payment
 - Search & filtering
 - Account settings
 - Notifications (email/SMS)
 - Localization (language change)
-

5. Out of Scope

- Backend APIs
 - Performance/load testing
 - Mobile apps (Android/iOS)
-

6. Test Items

- Bongobd.com website (<https://bongobd.com>)
 - Web functionalities and UI on supported browsers/devices
-

7. Features to be Tested

- Authentication (Signup/Login/Logout)
 - Video playback engine
 - Watch later & favorites
 - Content categorization & filters
 - Language switch (EN/BN)
 - Email/SMS notification triggers
 - Subscription flow
-

8. Features Not to be Tested

- Admin panel features
 - Third-party content source performance
 - CDN/infrastructure-level issues
-

9. Test Approach / Strategy

- Manual testing of UI and functional flows
 - Black-box approach
 - Positive and negative test cases
 - Cross-browser/device testing
 - Bug tracking via Excel or a simple bug tracker
-

10. Entry Criteria

- All features are developed and deployed to staging
 - Stable build is available
 - Required test data is prepared
-

11. Exit Criteria

- All test cases executed
 - Major/critical bugs fixed and retested
 - Test summary report submitted
-

12. Test Deliverables

- Test Plan document
 - Test Cases (Excel/Sheets)
 - Bug Report
 - Test Summary Report
-

13. Testing Schedule

Phase	Timeline
Test Planning	Day 1
Test Case Design	Day 2 – Day 3
Test Execution	Day 4 – Day 6
Reporting	Day 7

14. Resources / Roles & Responsibilities

Role	Responsibility
QA Engineer	Test case writing & execution, bug reporting
Developer	Fix reported issues
QA Lead	Review test artifacts & reports

15. Environmental Needs

- Browsers: Chrome, Firefox, Safari, Edge
 - OS: Windows 10/11, macOS
 - Devices: Desktop, Android, iOS
 - Test data for user login, subscriptions, etc.
-

16. Risks & Mitigation

Risk	Mitigation
Delayed development builds	Frequent sync with dev team
Unstable staging environment	Use backups or rollback versions
Unsupported browser behavior	Flag for compatibility fixes

17. Approval / Sign-off

Name	Role	Approval Status
Sheikh Abidur Rahman	QA Engineer	<input checked="" type="checkbox"/> Approved
QA Lead	Test Lead	<input type="checkbox"/> Pending
Project Manager	Stakeholder	<input type="checkbox"/> Pending
